

INTRODUCTION

DRAGADOS GAMO MARINE S.A.

DRAGADOS GAMO MARINE S.A. is a company specialized in maritime works and hydraulic engineering, with experience in construction dredging, maintenance dredging, bathymetric surveys, dredging plans, hydraulic filling, geotube filling, environmental management plans for dredging, marina construction, pier construction, pile driving, breakwaters, sunken vessel recovery, and other related activities.

GAMO Marine has a highly trained and specialized team in this field, allowing clients to entrust us with this essential work for the normal development of their activities.

CORPORATE VALUES

GAMO MARINE is capable of undertaking maritime projects, as we have well-maintained operational equipment and a stock of spare parts, ensuring our clients' confidence in successfully completing every project.

RESPECT

PROFESSIONALISM

SAFETY

TEAMWORK

ENVIRONMENTAL POLICY

Our company is committed to environmental preservation, which is why we have an environmental management department and a strict policy on respecting the environment in the areas where we operate. We follow protocols to remove waste and hazardous materials (used oil, oil and fuel filters) and dispose of them in compliance with legal regulations. We strive to minimize negative impacts on the flora and fauna of the areas where we discharge sediments.

We have special absorbents for containing and absorbing potential fuel spills to prevent water contamination.
